

# NBCWATERSHEDEXPLORERS.COM Scavenger Hunt

Please visit the Narragansett Bay Commission (NBC) Watershed Explorer website at [www.nbcwatershedexplorers.com](http://www.nbcwatershedexplorers.com) and answer the following questions. Once you have answered the questions, either email them to Mrs. Morissette from the button at the bottom of the website (please include your full name and teacher's name in the subject) or record the answers on this sheet and bring it in to give to Mrs. Morissette during any of her monthly visits. This can be done from now until April. Students who complete the scavenger hunt will receive a small prize for handing it in.

1. Click on the Summer Camp button at the top of the homepage. In the second row of pictures, the educator from Save the Bay is holding an arthropod. What specific arthropod is she holding? This creature can be found in Narragansett Bay.
2. Click on the More button, when the menu drops down, click on About Us. Name one of the NBC's wastewater treatment facilities. We own the two largest in Rhode Island.
3. Click on the Challenges button at the top of the homepage. What do you need to do for challenge number 4?
4. Click on the Really Cool button and read the last article about the spotted salamander. How many eggs does it say the spotted salamander could lay up to?
